Muhammad Noralif bin Mohd Ridzuan

PROFESSIONAL SUMMARY

Bachelor's student in Electronic Industrial Automation Technology at Universiti Malaysia Pahang Al-Sultan Abdullah (UMPSA), with hands-on experience in PLC programming, HMI development, electrical troubleshooting, and IoT system integration. I've worked on real installations during a six-month internship in security systems and built an IoT-based monitoring project from the ground up. I'm seeking a 12-month internship (22 February 2027 to 22 February 2028) where I can put my technical skills to work on automation and electronics projects and keep growing as an engineer.

EDUCATION

Bachelor of Electronic Industrial Automation Technology (Hons) November 2024 – Present
Universiti Malaysia Pahang Al-Sultan Abdullah (UMPSA)

Diploma in Electronic Technology 2020 – 2024
Kolej Vokasional Slim River

- Sijil Vokasional Malaysia (SVM) in Electronic Technology
- Sijil Kemahiran Malaysia (SKM) Level 3 in Electronic

WORK EXPERIENCE

Security System Technician (Internship) May – October 2024
DLA Engineering Sdn. Bhd. | *6 months*

- Carried out electrical wiring, system installation, configuration, and troubleshooting on site.
- Installed and tested RFID access control, autogate, barrier gate, and turnstile systems.
- Performed basic maintenance and functional testing on electronic systems.

Online Seller (Self-Employed, Part-Time)

- Managed online sales, product listings, and customer inquiries.
- Processed customer orders and coordinated shipping.
- Tracked product stock and handled sales transactions.

PROJECTS

Automatic Chicks Counterweight System: IoT-Based Chicken Weight Monitoring

- Built an IoT system to monitor chicken weight automatically, using an ESP32, load cell, and HX711 amplifier.

Teaching Factory: Automotive Absorber Assembly Production Line (UMPSA)

- Worked on an automated assembly production line for automotive absorbers as part of a university teaching factory project.

TECHNICAL SKILLS

- **Industrial Automation:** Omron PLC (CJ2M-CPU33), Mitsubishi GOT HMI, Omron MX2 VFD, Omron TM5 Collaborative Robot
- **Control Systems and Troubleshooting:** PLC ladder logic, HMI configuration, motor control, control panel wiring, electrical troubleshooting
- **Software and Programming:** CX-Programmer, CX-Designer, Arduino IDE
- **IoT and Sensors:** ESP32, Arduino, BME280, DS18B20, load cell, HX711

ADDITIONAL SKILLS

- Leadership
- Teamwork (experience from group projects at UMPSA)
- Time management
- Customer communication (from running my own online business)
